

Delft University of Technology

NXP Scholarships

NXP offers a number of scholarships for students with interest in a future career in microelectronics.

Level of study	Master
Programmes	Offered by the Department of Microelectronics and Computer Engineering
Scholarship amount	The scholarships of NXP consist of maximally € 15,000 for the entire duration of the MSc programme of 24 months. This amount will cover most of your living expenses and includes a budget for the obligatory health and liability insurance taken care of by TU Delft.
Conditions of the scholarship	<p>Initially the scholarships will be provided in the form of loans. Upon successful graduation NXP will probably offer you a position as an employee depending on the actual vacancy situation.</p> <p>If you have been offered a position at NXP one third of your loan will be changed into a grant after each consecutive year of employment. If you have been working for NXP for at least 3 years the total loan will be changed into a grant.</p> <p>If you do not accept the job offer the scholarship loan has to be refunded to NXP within 3 years.</p> <p>If for whatever reason NXP cannot or does not offer you a position the loan will be changed into a grant and you will no longer have the obligation to refund the loan.</p>
Selection criteria	Candidates are expected to show a clear interest in a future career in microelectronics. In your essay you have to convince the Grant Awarding Committee of the Department of Microelectronics that you are interested in an education and a future career in the design of electronic circuits and systems or semiconductor physics and technology.
